

Area and Perimeter of Composite Shapes

- 1) Make a design using all your shapes and lay it on top of your graph paper.
- 2) Trace your design and each of your individual shapes.
- 3) Find the area of each shape using their dimensions and formulas. Do the best you can estimating the squares.
- 4) Write the area inside each shape.
- 4) Find the total area of your creation.

Let's see who can get closest to the exact answer!
